**BETTER LIFE**  
Integration & Support Society

As an offender prepares to go home, there are gaps the local faith community can fill as part of the answer to "What's next?"

Focused mentorship and participation in a supportive faith community has been a key component in many successful reintegration plans.

We make faith communities aware of opportunities and help equip and resource their volunteer mentors to be catalysts in changing the direction of those coming home.

We're a volunteer movement with a mission to develop and deliver **faith-based social and restorative justice programs** that foster community safety and mitigate the impact of crime on those who suffer from its consequences.
